

Introduction to Containers

Pre-requisite

In preparation for your upcoming hands-on lab please:

1- Open a personal Google Cloud Platform account.

- - This option allows you to run the labs from the GCP portal with nothing installed locally.
- - GCP will give you \$300 credit and/or one year use for testing their platform.

There is a requirement to enter credit card information but you will not be charged. If you exceed the \$300 usage you will be notified to 'upgrade account' and then start the billing. The labs we will be running will cost you less than \$1.00 (probably more like \$0.25)

Open a personal Google Cloud Platform account

Go to - <https://cloud.google.com>
